Lauren Garcia **Sr. Software Developer / Architect / Consultant / Technical Advisor**

Email: eljee@protonmail.com - Github: laurengarcia - Phone: 510.424.4085

Authorized to work in US - Seeking remote full-time or consulting position - Pacific Time, SF Bay Area

---

Node.js / Express.js / Typescript / Javascript / React Specialist
Public API Design / I care deeply about Developer Experience (DX) & UX.
Open-source author & maintainer (top 2% of NPM, 4.5M+ downloads in 10 years).

— Work Experience —

Minifetch - **Architect / Solo-Dev / Open-Source Dev** - *May 2025 to present*

Built a hosted version of my popular isomorphic NPM module **url-metadata** (top 2% of NPM, 4.5M+ downloads in 10 years) that has credit card payments (Stripe) and x402 stablecoin payments, built on top of Express.js. It's a developer toolkit for AI agent builders that scrapes & extracts metadata and content from web pages, plus technical SEO audits. Has its own open-source API Client (**minifetch-api**).

Sydecar - **Consultant / Frontend Architect** - *July 2022 to April 2023*

Upgraded complex React/ Redux/ Typescript/ Webpack frontend stack (sped up Docker perf, big Redux refactors, module updates, improved CI in GCP) and helped integrate new Postgres ORM (Prisma). Architected skinnable React components library as NPM module with custom Storybook.js/ TailwindCSS. Managed team of 4 remote contractors to complete.

Decrypt / **Consensys** - **Consultant / Advisor** - *August 2021 to December 2022*

Technical + strategy consulting and advisory for design & implementation of tokenized media protocol that was reverse-merged into dastan.co

Heni.com / **Damien Hirst** - **Consultant / Advisor** - *June 2021 to January 2022*

Technical consulting and advisory for initial mint and drop of world-renowned artist Damien Hirst's debut NFT collection The Currency, an Ethereum ERC-721. Advised CTO on monitoring dashboard.

NicheNetworks - **Principal** - *June 2019 to December 2021*

Validator infrastructure provision for eco-friendly Proof-of-Stake networks. Built custom alert system into Telegram for 24/7 monitoring & alerts. Won $30k grant in 2019 from 0x Protocol (ZRX) to build a DEX using 0x.org, Ethereum, NFTs, AWS Lambdas, Infura + MySQL.

TeeSpring - **Consultant** - *May to July 2019*

Architected & built scaling solution for creator "merch shelf" on YouTube using serverless AWS Lambdas (Node.js). Clean hand-off to internal Rails team complete with docs & training.

FullCycle - **Consultant** - Feb 2018 to December 2018

Technical consulting on a tokenized private security fundraise for ESG-focused VC. Collaborated with stakeholders, software vendors and legal team.

DuckDuckGo - **Senior Software Engineer** - February 2017 to February 2018

Architected next-generation fleet of browser extensions focused on privacy and security, named one of 14 best Firefox browser extensions of 2017 by ComputerWorld. Stabilized and upgraded a large-scale autocomplete service using existing Grafana metrics and Node.js clusters.

Dat Project - **Open Source Contributor** - *2016*

Contributor to foundation-funded open source distributed file system for the decentralized web (similar to IPFS, Bittorrent — a Kademlia DHT).

Crunchbase - **Consultant** - *2015*

Greenfielded & architected new Node.js client app. Ramped up junior devs on Node.js development & tooling. Managed large refactors and tech debt on legacy Rails + jQuery stack.

Vote.org - Consultant - 2014 to 2015

Designed UI & built new "Partner Portal" with Node.js, Angular and D3.js that won award for "Best New Feature or Product" at Netroots Nation 2015. Launched Absentee Voter tool using Rails + jQuery.

Previous: Software dev at **Datapad [acquired by Cloudera]**, **PowerReviews [acquired by Bazaarvoice], Yahoo.com, Wavemarket [acquired by Qualcomm]**

— Skills —

- **NPM modules / Open-source:** Created & maintain popular **url-metadata** package (4.5M downloads), and more recently **minifetch-api**. Public API design & implementation
- **Frontend:** React, Redux, TypeScript, Webpack, Tailwind, SASS, Storybook.js, ESLint/Babel, Browser Extensions. Google Analytics, Google Search Console.
- **Backend:** Node.js, Node.js clusters, Nginx, Serverless (AWS Lambda), WebSockets / WebRTC, Redis, LevelDB, PostgreSQL & Prisma ORM, MySQL, SQLite.
- **Cloud & DevOps:** Grafana, Winston, PM2, Docker, Git, CI/CD (GitHub Actions), Google Cloud Platform, AWS.
- **AI / GenAI:** LLM tooling, MCP servers, codes with Claude via Filesystem MCP.
- **Web3:** Ethereum/EVM smart contracts, dApp tooling, ERC-721 + ERC-20 (tokenization)
- **Expert debugger:** Can drop into the stack & solve complex, baffling bugs.
- **Screening, hiring & training developers.** Managing & coordinating distributed dev teams.
- Firm grasp & passion for **DX / UX / UI** and product design.
